

Greg Bates

Chief Technology Officer / Lead Engineer

Chief Technology Officer and Lead Software Engineer with 10+ years of experience in flawless preparation of mobile and web based platforms while maintaining the utmost confidentiality. Since my start in developing at the age of 14, I've had ample time to become a creative and problem solving mind. Worked with brands such as Walmart, BMW, Under Armour, Best Buy, among others.

WORK EXPERIENCE

Lead Engineer AMP Emergency

08/2018 – Present

Los Angeles, CA

Achievements/Tasks

- I lead the development of all software under the AMP umbrella including emCall iOS and Android (a panic / medical alert solution), emCall Watch (an extension of emCall), and eSparc (a remote patient diagnostic monitoring solution that interfaces with many different medical devices via bluetooth). I'm employee #1.

Lead Engineer Cisco Systems

02/2013 – 04/2019

Irvine, CA

Achievements/Tasks

- During my time here, user bases for the iOS and Android apps I mainly contribute to (Cisco Spark, WebEx Meeting, and CWS Mobile Browser most notability) grew in the multi-millions and have been recognized by great publications like CNET, Gartner, and Tech Innovator as superior to the many competitors. I led a team of 8 engineers.

Software Engineer Alpine Electronics of America

02/2009 – 01/2013

Torrance, CA

Achievements/Tasks

- Worked on embedded system programming specialized in real time data processing (e.g. real time traffic, weather etc.), which is used in a navigation system for auto brands Honda, Kia, BMW, and Toyota

SKILLS

React Native React.js Node.js Angular.js PHP

Yii Framework Laravel Android Development

iOS Development Swift Java Ionic Framework

Restful APIs MySQL SQLite MongoDB

Firebase AWS Lambda AWS EC2 Docker

Azure Objective - C
